Summary

Jebin Joseph is a passionate Full Stack Developer skilled in front-end and back-end development. Experienced with HTML, CSS, JavaScript, React, Python, Django, and SQL, he builds dynamic, responsive websites and applications. Jebin enjoys problem-solving, creating user-friendly designs, and delivering high-performance solutions while staying updated with the latest tech trends.

Experience

2024 - 2025
Web Desiniger

FullStack Developer

Full Stack Developer with hands-on experience in front-end and back-end development. Skilled in building dynamic, responsive websites and web applications using technologies like HTML, CSS, JavaScript, Python, Django, and SQL. I enjoy solving complex problems, creating user-friendly designs

Projects

2024 - Dec

ToDo -List

Developed a fully functional Todo list web application using Django, featuring CRUD operations, user authentication, and a responsive interface for task management.

2025 - Jan

Siva Prakasha Saba

Designed and developed a dynamic website for Siva Prakasha Saba using Django, featuring event updates, photo galleries, member registration, contact forms, and a mobile-friendly responsive design to engage community members effectively.

2025 - Mar

Wedding Static Website

Created a beautiful, responsive static wedding website using HTML, CSS, and JavaScript, featuring event details, photo gallery, RSVP form, and smooth scrolling effects for an elegant user experience.

2025 - May

Online Course E-commerce Website

Developed a dynamic online course platform using Django, with features like course listing, video content, student registration/login, payment gateway integration, order history, and admin course management, providing a complete e-learning experience.
